TO MEET ALL YOUR JOB-SPECIFIC DEMANDS.**

## LumiNode 12 RJ45

A **high port count small form factor** Ethernet/DMX processing device for converting, routing, and merging DMX/RDM data. For installations where rack space is valuable.

LumiNode 12 RJ45 is specifically designed with a metal, robust half 19" enclosure for single or dual rack mounting, making it an ideal solution for theatre- and studio installs.

Achieving up to 24 outputs in a 1U rack space. The RJ45 DMX connectivity makes it possible to integrate with common and cost effective infrastructure with Cat5e (or higher) cabling.

### FEATURES

- 2 x 1Gb RJ45 ports
- 16 onboard process engines
- 12 x RJ45 DMX/RDM ports
- Ports are fully isolated
- Ports can be configured as an in- or output
- All relevant industry standard protocols (Art-Net, sACN, KiNET, RTTRpl Blacktrax) are supported

**MADE IN BELGIUM**

# LumiNode 4<sup>DiN</sup>

A **compact DIN** and easy to deploy Ethernet/DMX processing device that fits every fixed installation.

LumiNode 4 DIN is specifically designed for fixed installation to fit on a **standard DIN rail**. The compact design and standardised mounting bracket is ideal for Architainment applications and install projects. For full flexibility the unit comes with DMX/RDM on RJ45 connectors or on Terminal Blocks.

## FEATURES

- 2 x 1Gb RJ45
- 6 onboard process engines
- 4 x RJ45-DMX or 4 x 3-pin plugable terminal block
- Ports are fully isolated
- Ports can be configured as an in- or output
- All relevant industry standard protocols (Art-Net, sACN, KiNET, RTTRpl Blacktrax) are supported
- Powered over PoE or DC voltage

# LumiNode 4<sup>WALL</sup>

An easy to deploy Ethernet/DMX processing device that mounts flush into a **cabinet or duct**.

LumiNode 4 Wall is specifically designed with a metal, robust enclosure for flush wall mounting or integration in a cabinet or duct. The ideal solution for cruise ships, yachts, theatres, TV-studios, theme parks or architainment installs.

## FEATURES

- 1 x 1Gb etherCON port
- PoE powered via 1Gb RJ45 port (rear side)
- 6 onboard process engines
- 4 x 5-pin DMX/RDM ports
- Ports are fully isolated
- Ports can be configured as an in- or output
- All relevant industry standard protocols (Art-Net, sACN, KiNET, RTTRpl Blacktrax) are supported
